****Purchase your machine, film, & trays in 1 easy step!***

Perfect for sealing all kinds of food packages!
Over 50 trays available!

The EHQ-200 – excellent entry level model

The unit is an entry level automatic tray sealing machine. Simply place your filled tray into the bottom plate and the machine does the rest. The food tray will be taken into the machine, a film is applied, and then the machine opens and passes you the sealed tray. The whole process takes seconds.

Features

- Easy to use w/ automatic sensor
- Perfectly consistent seal each time
- Simple to use – easy to load film and heater set
- Built-in safety feature to prevent injuries
- Precut tray molds (heater sets) available in the following sizes:

Custom designs available
- Instruction manual included
- One-year manufacturer's warranty

Step 1:
Turn on machine.

Step 2 - Insert your tray of food into the tray holder.

Step 3: The machine will automatically take the tray into the machine and apply a film covering

Step 4: The machine then opens automatically for you to remove your sealed tray of food
