

No Nozzle Type, Tabletop, Vacuum Sealer

WVT-455T

- *Nozzle is not needed*
- *Pump inside*
- *Single or double sealing (top & bottom)*
 - *Compact*
 - *Portable*
- *Easy to operate*
- *For gusset bags only*
- *Multi-bag sealing operation*

WVT-455T is a no nozzle type vacuum sealer. Instead of using a nozzle, this sealer uses a small chamber to vacuum the air. An external pump is not needed. This is a complete unit ready to work on gusset bags only. The sealer is also equipped with a single and double selector switch so the user has a choice of using one sealing bar or two sealing bars (top and bottom) for greater heat penetration when sealing thicker material. WVT-455, a single sealing bar unit, is available on special order.

OPERATION: Set the vacuum, sealing and cooling time. Insert the bag between the sealing jaws. Press down on the handle and the machine will start its vacuuming, sealing, and cooling cycle automatically.

Power Supply	110V	Vacuum Time	0-30 secs.
Power (watts)	1900w	Cooling Time	0-10 secs.
Max. Sealing	5mm, 17.7"	Pump Cap.	40L/min.
Material Used	Gusset	Weight	78 lbs.
Sealing Time	1-90 secs.	Dimensions (L x W x H)	20.5" x 25.4" x 12.5"
